June 2005

Located in central Montana, Fergus County is Montana's 15th most populous with 11,539 residents, according to the 2004 Census Bureau estimates. Lewistown, the county seat, is the state's 14th largest city with a population of 5,923, according to the 2003 Census Bureau estimates.

Agriculture is important to the area's economy. Fergus County is eighth in Montana for the largest number of farms and ranches: 830 (see inside table). The county is third in the state for number of beef cattle farms and ranches. The cattle industry is the number one agricultural industry in Montana in terms of sales and revenues, according to the 2002 Census of Agriculture. In addition, Fergus County is ranked ninth out of 3,059 counties in the U.S. for acres of land used for hay, haylage, grass silage, and greenchop, and is number one in Montana for number of acres used for these commodities.

Hay production has become an important commodity in Montana, especially in the last few years, because many counties are struggling with severe to extreme drought. As a result, the U.S. Department of Agriculture website explains that under certain emergency conditions, such as drought, emergency haying and grazing of acreage enrolled in the Conservation Reserve Program (CRP) may be authorized which has recently been allowed in Montana. The department's website shows current drought conditions in Montana and explains the CRP emergency haying program at: <http://www.drought.unl.edu/dm/monitor.html>, for those interested in monitoring conditions in the state. As a result of Montana's drought conditions, a hay hotline was also established to help persons buy and sell hay. Contact the Montana Department of Agriculture at 406-444-2404 for more information on the hay hotline.

The county is also renowned for its water. Blue Water Works produces 99 million gallons of water a day. The 2004 Employment by Industry table on the inside, shows nearly one-fourth of the covered employment is in the government sector. Health care is also noticeable in the private sector with about 20 percent of the total private workforce. Construction is also a significant sector with nearly 11 percent of the total private employment and manufacturing with nearly 10 percent of the total private employment, which compares to about six percent statewide.

According to the U.S. Census Bureau, median income for Fergus County households in 2002 was \$31,097, compared to Montana's median income of \$34,105 for the same year. Median income addresses the per household income in the county (no matter how many people live in the home); per capita income (inside table) is total income in the county divided by the number of people in the county.

According to the *Montana Almanac*, by authors Andrea Merrill and Judy Jacobson, the county was established in 1885 and named for James Fergus, a pioneer, miner, cattleman, and territorial legislator. There's been debate on where Lewistown takes its name, but it's generally believed it's named after Camp Lewis, established in 1874 by Major William Lewis of the 7th U.S. Cavalry. It began as a trading post on the Carroll Trail in the 1880s and incorporated in 1899.

Be sure to check our location quotients for Fergus County on the website. Location quotients are a measure of the concentration of an industry's employment in Fergus County relative to the nation as a whole. A location quotient greater than 1 generally indicates that the industry is more concentrated in Fergus County than in the nation as a whole, while a location quotient less than 1 indicates it is less concentrated in Fergus County than in the nation as a whole.
